### **Calvert County Launches PASS Map to Track Building Permits**

**PRINCE FREDERICK, Md. – March 1, 2018** – The Calvert County Department of Technology Services and the Department of Planning & Zoning have launched a new interactive Permit Activity Status System (PASS) map online. Citizens can now go online to track building permits such as plumbing, electrical and grading permits through every step of the permitting process.

The PASS map was created to make the permitting process easier and more convenient for builders, contractors and permit runners. It displays active and recently completed building permits and planning applications throughout Calvert County. Citizens can track the permits by number or by address, and can view the status of building, condition and inspection reviews. The PASS map is connected to the county government's land management system and is updated daily.

The Department of Technology Services offers a variety of Geographic Information System (GIS) maps including a "What's Going Where" map where citizens can learn about commercial buildings currently in process to be built. GIS is used throughout Calvert County Government to support a variety of functions including planning, environmental sustainability, emergency response, public works, parks & recreation and economic development.
