Residents Asked to Reduce Mosquito Population by Eliminating Standing Water

PRINCE FREDERICK, Md. – June 13, 2017 – The best way to prevent mosquito bites and mosquito-borne diseases is to get rid of mosquito breeding habitats. Now that mosquito season is here, the Calvert County Department of General Services, Mosquito Control Program is asking residents to assist in the control of mosquitoes. Any area or container that holds water for a week or more has potential to produce hundreds, or even thousands, of mosquitoes.

The county Mosquito Control Program team encourages residents to take steps to reduce the number of mosquitoes around homes and properties by eliminating standing water. In addition, residents are urged to:

- Drain or dump tarps, buckets and flower pots
- Keep roof gutters free of leaves and other debris
- Fill in tree stump holes from blown over trees as soon as possible
- Dispose of cans, plastic containers and anything else that can hold water
- Cover or drill holes in recycling containers or outside trash cans
- Turn wheelbarrows, wading pools, children's toys and other similar items over or put them away
- Store boats covered or upside down
- Clean and put fresh water in birdbaths or wading pools regularly

Page 2

- Make sure your home's windows and doors have proper screening
- When outdoors wear light-colored long pants and long sleeves
- Use an approved insect repellent according to manufacturers' instructions

The Calvert County Mosquito Control Program provides countywide integrated pest abatement of nuisance and vector (disease carrier) mosquitoes. For a comprehensive overview of the program, visit online at www.co.cal.md.us/MosquitoControl, by email at Mosquito Control at mosquitocontrol@co.cal.md.us or via phone at 410-535-6924.

###

Calvert County is Maryland's smallest county in land area with 213 square miles. It is home to more than 91,000 people and has one of the highest standards of living in Maryland. Major industries include defense contracting, information technology, tourism, energy, advanced manufacturing and administrative services.
