TOTAL	tons	

* 1 ton = 2000 pounds. To get tons if you have pounds divide the pounds by 2000 (e.g., 4520 pounds/2000 = 2.26 tons).

- 1 The material must be composted or mulched and marketed! **Simply spreading a material on a field DOES NOT constitute a composted/mulched material and does not count as a recyclable material.** Composted/mulched material that ends up being disposed in a landfill does not count as a recyclable material.
- 2 Consists of non-source-separated MSW materials (i.e., trash).
- 3 Includes recycling of wood products (e.g., pallets, crates, barrels, wood furniture, canes, crutches, etc.). **Materials must be mulched or composted ONLY.** Otherwise, include in "Other Materials" category.
- 4 Tires that are recycled into new products containing rubber (e.g., trashcans, storage containers, rubberized asphalt, etc.), and use of whole tires for playground and reef construction. **Tires sent to an incinerator DO NOT count as recycling.**
- 5 List the material.

The undersigned hereby certifies that the tonnages reported on this form are true and accurate. Records will be made available to the county for verification if requested.
